

Sai Krishna Vaddeboina

Worcester MA 01609 | (774) 437-0403 | ysaikrishna017@gmail.com

EDUCATION:

Worcester Polytechnic Institute (WPI), Worcester, MA

Master's in Financial Technology (FinTech), GPA: 3.7/4.0

Aug 2024 – May 2026

Relevant Coursework: Financial Analytics, Business Application of Blockchain Tech, Business Intelligence, Data Management For Analytics, Marketing Research

Noble degree & PG college, Hyderabad, India

Bachelor of Commerce in CA, CGPA: 8.0/10.0

Dec 2020 – May 2024

SKILLS:

Programming Languages: Python (Pandas, Matplotlib), SQL, Jupiter Notebook

Data Analysis & Visualization: Tableau, Power BI, Excel, NVivo 12 Plus

Blockchain Development: Truffle, OpenZeppelin, Web3.js, Chainlink

Web Development: Vue.js, Express.js, MongoDB

Tools: Git, Docker, Microsoft Azure

Office & Productivity Software: Microsoft Office Suite (Word, Excel, PowerPoint), Google Workspace

Operating System: Windows, macOS & Linux

CERTIFICATIONS:

Microsoft Office Intermediate Program – Word, Excel, PowerPoint

SAP Finance & Controlling (FI-CO) Power User Course Certificate

Data Analytics and Visualization Job Simulation Certificate – Accenture

International Conference of CA Students – ICAI, Hyderabad (Dec 2-3, 2022)

PROJECTS:

Business Intelligence: Myntra USA Market Expansion

Aug 2024 - Dec 2024

Tools: Tableau, Power BI, Microsoft Azure, SQL

- Conducted BI analysis on Myntra's USA expansion strategy using advanced analytics tools.
- Developed dashboards to track sales performance, customer segmentation, and regional demand trends.

Marketing Research: Student Class Participation Analysis

Aug 2024 - Dec 2024

Tools: Qualtrics, Excel, NVivo 12 Plus

- Conducted qualitative and quantitative research on student engagement using surveys and interviews.
- Applied thematic analysis to develop student personas and recommend engagement strategies.

Data Management & Analytics: Amazon Sales Data Analysis

Aug 2024 - Dec 2024

Tools: MySQL, Tableau, Excel, Python (Pandas, Matplotlib)

- Analyzed 10,000+ Amazon sales records to uncover pricing trends and customer behavior.
- Applied K-Means clustering, Random Forest classification (87% accuracy), and regression analysis ($R^2 = 0.72$)
- Built interactive Tableau dashboards for data-driven insights.

Earnings Announcements & Stock Price Movements Analysis

Jan 2025 – Apr 2025

Tools: Jupiter Notebook, Excel, Python (Pandas, Matplotlib), Yahoo Finance API

- Analyzed how earnings announcements affect stock price movements across different sectors.
- Conducted regression analysis and trading volume analysis to correlate earnings surprises with stock price behavior.

Blockchain-based Property Management System Development

Jan 2025 – Apr 2025

Tools: MongoDB, Express.js, Vue.js, Truffle, OpenZeppelin, Chainlink, Docker, Web3.js

- Developed a decentralized application for real estate transactions using blockchain.
- Integrated smart contracts for property listing, buying, and secure ownership transfer with multi-signature and role-based access control.
- Dockerized the system and used Chainlink oracles for real-time price validation.

Predicting Student Depression Risk (Machine Learning Project)

Jan 2025 – Apr 2025

- Built a predictive model (Random Forest, Logistic Regression, XGBoost) on 27,000+ student records to identify early depression risks.
- Applied feature engineering (encoding, binning, interaction variables) and achieved 87% accuracy, 88% recall, AUC = 0.92.
- Delivered ethical, business-focused recommendations for early intervention in higher education.
